

## The Wright Stuff

### A Word from Bob Wright

Friends, welcome to the new and improved American Anti-Cancer Institute (AACI) monthly newsletter. Through these missives that will come to you automatically once you have registered (just click [here](#)), we will attempt to keep you abreast of what is happening in the “anti-cancer” community, update you on new treatments, therapies, protocols, and supplements, continually show you what is not working for cancer (it’s **that** important), and bring you up to speed on the workings of the AACI and our new “World Center” Campus.

Yes, I said “World Center” Campus. If you have not been in the loop, the AACI is building a brand new, 100-acre, Wellness Campus that will be the very first of its kind – anywhere. More about that later.

We are looking for those that want to become involved with the AACI. If this is you – and we hope it is – please go to our website, fill out the ambassador application [here](#), and forward it to the home office. We have filled the positions for our four regional ambassadors and are now looking for state ambassadors in all 50 states. Ultimately, we will have several per state working with the regionals to spread the word about the AACI and what we are doing, and to help plan events and fundraisers, etc. In other words, supporting and promoting our organization in any way that you can. Take action and help expose the **TRUTH** about cancer now – WE need you.

Our current regional ambassadors are Valerie Ward, Western Region – San Diego; Michelle Raley, Mountain Region – Tulsa; Lynnette Pate, Midwest Region – Missouri; and Jean Sumner, Eastern Region – The Villages, Florida. Yes, they are all women and, yes, they are all reputable professionals at the top of their field. We are privileged and delighted to have them as part of Team AACI.

Again, welcome to our newsletter. Please feel free to give us your input, ask questions, and forward your testimony telling us (and all the world) what worked for you. You will find that, at the American Anti-Cancer Institute, we know what heals cancer – we just all need to pay attention.

**Welcome!**

## INSIDE THIS ISSUE

Protandim – Bill Henderson

Amazing Results with Paw Paw

Salt is Salt – Or Not?

Personal Testimony from AACI Board Member, Ed Johnson

The American Anti-Cancer Institute Progress Report

### Protandim – Bill Henderson

Many of you have heard of the new supplement in the marketplace called Protandim and are wondering whether it is being used in cancer treatment and if it is effective. Hold on to your hat!

We have been studying Protandim for quite a while now. Physical results from those utilizing this all-natural substance seem to be both extensive and profound. While we make no claims for cancer cure (only the human immune system cures cancer), we know of several who are stating that this is the only thing they changed in their lives and their cancer is gone.

Protandim is a combination of milk thistle, bacopa, ashwagandha root, green tea leaf, and turmeric. Now, many of you know that each one of these naturally occurring substances is very “anti-cancer” all by itself. It appears, however, that the synergism produced by combining these within a specific formula, is nothing short of amazing. This herbal concoction is said to be one of the world’s most spectacular antioxidants and is a prime activator of the S.O.D. enzyme (superoxide dimutase). Here’s where it gets good. Each S.O.D. enzyme has the ability to neutralize over 1 million free radicals per second for 13 days. Yeah, I’d call that spectacular! Protandim can’t hurt anyone and appears to help just about everyone – regardless of the physical challenge. We are now recommending it to cancer patients – although we would discourage anyone from relying on this alone to heal their cancer.

Enter Bill Henderson. Bill is a very active member of the AACI Advisory Board and one of the best cancer coaches this side of the equator. Bill also recommends Protandim and has done his homework on it. Actually, he is so enamored with it that he markets it – but does not profit from that marketing. He is now donating all the profits from this venture to the AACI. Bless your heart, Bill! And, no, we did not solicit this and already recommended this product before Bill made his decision. We would promote this product regardless. Just so you all know – there is no

conflict of interest here. If you wish to acquire this product – and we think everyone should – either find a distributor near you or go to Bill’s [website](#). We all benefit this way. Many of you are now wondering, “What on earth is bacopa?” Look it up!

### Amazing Results with Paw Paw

The fruit and twigs of the graviola and paw paw trees are known by many to have anti-cancer compounds. The graviola tree is native to South America while the paw paw resides in North America.

Both extracts are said to work by blocking the ATP production in the cancerous cell and causing them to self-destruct. They are also known to support the immune system. Most experts involved in plant extract research will tell you that paw paw is 40-50% more powerful and effective than graviola. The Health Sciences Institute, in their January, 2001, Member’s Alert, stated that graviola was “10,000 times stronger in killing colon cancer than Adriamycin, a commonly used chemotherapy drug.” And, you ask, “paw paw is half again more powerful?” Yes to that – and here’s even better news.

Jacquelyn Johnston, a professional health coach and speaker, is working with paw paw and cancer patients in Richmond, British Columbia (suburb of Vancouver). The programs that she and other medical personnel have developed utilizing this substance with some other supplements are producing what we would call “near perfect” results. The last time I talked to Jacquelyn several months ago, she stated that their cancer healing success utilizing their paw paw protocol was 100%. Did you get that? 100%. Let’s see, the rate of remission for chemotherapy patients is only 2.9% over five years. Wait, let me do the math. That means that all of Jacquelyn’s patients are alive and 97.1% of all chemo patients are dead within five years. I don’t know about you, but if I were diagnosed with cancer I would surely be interested in finding out more about what she is doing. As Gibbs on NCIS likes to say, “Do ya think?” If interested, please contact Jacquelyn at 604-276-8673 or [jj@lifestyleforlongevity.com](mailto:jj@lifestyleforlongevity.com).

## Salt is Salt – Or Not?

The marketers have taken over. It appears that everyone is on the “sea salt” kick now. If it is sea salt – it must be good for you – right? Not necessarily.

You see, ALL salt is sea salt! I realize that statement is mysterious to some people, but it really shouldn't be. At one point in our vast history, all salt came from the sea. And, whether it was deposited in deserts, buried under hundreds of feet of rocks and soil, or found in other locales – wherever that might be – its origin was the sea. Ergo, all salt is sea salt. We naturally think that sea salt is better than table salt. We are also fooled into believing that salt is generically bad for us. Hence, the misunderstanding.

It is true that regular store salt is bad for us. Yes, it can raise your blood pressure. Stay away from it. It has been bleached, blanched, further processed, and robbed of the minerals that it was born with. Simply put – don't eat white salt (or white sugar for that matter). Real salt has color, usually shades of brown or pink. It is dug up from ancient seabeds that have been undisturbed for centuries and still has the 84 minerals that it has always had. This kind of salt is actually a health food. You virtually can't get too much of it (but don't go too crazy) and it won't raise your blood pressure. It's mineral and electrolyte constituents match that of healthy blood. Personally, I believe that to be a good thing.

I like Himalayan salt (the original – watch for knockoffs). You might find another source like a Celtic salt or something similar. Just make sure it is not processed and has color. Then enjoy!

## Personal Testimony from AACI Board Member, Ed Johnson

Following is the testimony of Ed Johnson, J.D. Attorney, former Assistant U.S. District Attorney, attorney to 3 different presidents, and Chairman of the American Anti-Cancer Institute's Advisory Board of Directors:

“My walk through the valley of the shadow of cancer began on a cold Monday morning in December, 1996, when I woke up with significant double vision. A call to my family physician resulted in an emergency MRI. My physician called with the shocking news that I had a large (2.4 cm) pituitary adenoma. He had called in the top Harvard Neurosurgeon in San Antonio who had reviewed the MRI results and had already scheduled me for surgery to remove the tumor, as it was significantly impacting my optic chiasm and nerves, and was in close proximity to my carotid arteries.

“On the morning of December 11, 1996, I had surgery to remove the tumor, with the knowledge (Informed consent) that I could possibly wake up blind – or dead – as the result of a severed carotid artery. The surgery was done through my nose using a special micro-surgical technique. Fortunately, neither of the aforementioned outcomes occurred, and I was scheduled for 62 days of radiation in January and February of 1997 to the pituitary area to kill any tumor cells left behind by the surgery. That was the plan anyway.

Continued on page 4

“However, I woke up on the morning of July 6th, 1998, with significant double vision, had an emergency MRI done, and was in a 2-hour emergency surgery at 10 p.m. that same night. This time, the surgeon aggressively attacked the tumor, which had engulfed my entire pituitary gland, and removed it all, including my pituitary gland, which is the ‘orchestra conductor’ of the organs of the body. I must take daily prescription supplements for the rest of my life to replace what the missing pituitary gland used to produce. A very small price to pay for this alternative to being blind or dead.

“During the recovery from my first surgery, I saw a ‘60 Minutes’ expose on Aspartame which showed that the incidence of brain tumors in the U.S. had risen in direct proportion to the consumption of aspartame (aka ‘Nutrasweet’ and ‘Equal’) being used as a sweetener in diet sodas and drinks, numerous foods, and other consumable products in the U.S. The chart showed the dramatic rise of brain tumors to be at a 45 degree incline, like a jet taking off. I had been drinking 10-12 Diet Cokes a day, thinking I was being ‘safely hydrated’ without the many calories of sugar in Coke.

“I set about to research aspartame and ran across an article in the office of my wife’s Podiatrist written by Dr. Betty Martini, the Founder of Mission Possible. This article made it clear that aspartame is a deadly excito-neurotoxin that not only causes brain tumors, but causes over 90 maladies, ranging from comas and seizures to blindness and death. I contacted her and my research and access to information skyrocketed. She provided me with the many medical articles that conclusively proved that aspartame would become a world-wide epidemic. Fast forward to today. I have appeared on the top talk show in Houston and in a 90-minute film documentary entitled ‘Sweet Misery in a Poisoned World.’ Please note that there are many thousands of medical articles and even a 1,038 page medical text, written by the world-renowned physician Dr. H.J. Roberts, regarding aspartame (Aspartame Disease: An Ignored Epidemic). Fortunately, I have been able to recover – by using natural means. My endocrinologist was amazed at this!

“In July, 2000, I wrote my story and research notes in a published article entitled, ‘Aspartame Causes Brain Tumors...Beyond a Shadow of a Doubt.’

“As my research continued, my son pointed out an excerpt from a book entitled, ‘Killing Cancer – Not People’ and I called the author of this book – who happened to be Robert Wright, the Founder and CEO of the American Anti-Cancer Institute. Fast forward again to 2011. Having dialogued and communicated with Robert Wright at length, I was invited to serve on the Advisory Board of the AACI. I am proud to serve on this Board and work closely with the AACI and Bob. The AACI is an IRS designated, 501© (3) organization dedicated to bringing the TRUTH about cancer, its prevention, and its cure to the public.

“Friends, one in two Americans will now experience cancer in their lifetimes – and cancer is the leading cause of death by disease for children 14 and under. Please join us in our life-changing mission by registering for our monthly newsletter, ordering the book, ‘Killing Cancer – Not People,’ helping us spread the word about the AACI and its mission and, if you feel so led, supporting us and our mission financially.

“I am both proud and excited to be a part of this wonderful life-enhancing and changing organization and ministry!

“God Bless you and your loved ones.”

Ed Johnson, J.D., Natural Health Advocate and Life Enricher

## The American Anti-Cancer Institute Progress Report

I founded the AACI about 4 ½ years ago with a basic mission to tell the world the real truth about cancer, the relentless killer that hounds and prematurely takes from this earth way, way too many of us every single year. A person dies of cancer in our country every minute of every hour of every day, needlessly. I figured it was time to stop this nonsense!

Well, it's been a long haul. Over these past few years, the AACI has run under the proverbial radar in order to lay a foundation that would result in an organization that would educate the human population so that they could start making wise decisions about their health – in particular, cancer. In this short span of time, we have made immense progress. We have established a large and very credible presence on the World-Wide Web and throughout social networking sites. Our book, "Killing Cancer – Not People" has been widely accepted as one of the best books ever written on cancer. It is in its fifth printing although it has never been marketed. Our board of directors has expanded and our advisory board will soon boast 25 of the world's most famous doctors, scientists and researchers – those who believe the same way we do. We have set up regional ambassadors and I have spoken at many different seminars, forums, and radio programs across this country. We sold out the grand ballroom at a large hotel in Tulsa recently – with over 500 eager listeners longing for the truth. We've been to Pittsburgh, Omaha, Lincoln, Dayton, San Antonio, El Paso, Phoenix, Palm Desert, Desert Hot Springs, Seattle, Kansas City, Jefferson City, back to Tulsa, and many others. Charlotte Gerson opened for me at the Rock Church event in San Diego. We have attended and been featured speakers at the Cancer Control Society's annual convention in Universal City for 2 of the last 3 years. We have partnered with Mom's-In-Charge and have done a speaking engagement with them at the Montage in Laguna Beach. Yes, we get around. This is what we are supposed to do.

But, now, we are taking it to the next level. Mentioned at the beginning of this newsletter was the AACI's new "World Center" Campus. It is now becoming a reality. With a \$250 million grant from one of the largest private trusts in the United States, the American Anti-Cancer Institute is making plans to move forward in spades.

With this single source, complete funding will build the campus, underwrite 4-5 satellite clinics, and provide for programs and operating capital over the next two years. Design is in play for about 14 major structures including the Institute itself (45,000 square feet), the University and Performing Arts Center (75,000 square feet), the inpatient Wellness Center (230,000 square feet – four tower), the whole foods/organic food Co-op (50,000 square feet and open to the public), the organic restaurant (20,000 square feet and open to the public), the World Center Hotel (4 – stories, 170 rooms), the Chapel and Spiritual Center (30,000 square feet); Health Club, Training and Rehabilitation Center (50,000 square feet); Outpatient Wellness Center/Clinic (30,000 square feet); Event Center/Arena & Conference Center (5 interconnected monolithic domes); Full Service Spa, Retreat, Detoxification Center (43,000 square feet); Water Station Zebra; the AACI Research Center; Youth Outreach (20,000 square feet – it's really about kids, folks); acres of organic farming fields; 40 greenhouses; Holistic Veterinary Clinic; River Park & Gardens, etc., etc., etc.

We hope to break ground soon and move forward rapidly. We have put together an array of continuous funding programs to help underwrite costs associated with our cancer patient facilities. Future newsletters and our website will give ongoing progress reports. Please stay in touch.

**WHAT WOULD THE AUTHOR, BOB WRIGHT, DO IF HE HAD CANCER? The "Wright Stuff," of course!**

### **IN THIS BOOK:**

- Read meticulously documented **Truth** about the AACI **Cancer Paradigm** and what it means for you and your family.
- **Be amazed by doctors** and medical professionals who know this Truth-- some want you to know it, and some don't... Learn why.
- Learn what you absolutely *must do and stop doing* if you have cancer right now, and what you *must do* for cancer prevention.
- Understand detoxification and the cancer diet in plain English.
- Learn about the **American Anti-Cancer Clinic:** situated within a 100-acre plus cancer-healing complex in the Pacific Northwest, to which cancer victims can come from all over the world where all their needs will be met—medical, educational and nutritional, at less than one tenth the cost of current cancer care today. We believe that "**if we build it, they will come!**"

This Book represents our "bread and butter" fundraiser, so we greatly appreciate your purchase and thank you for supporting the AACI. \$12 of each book is tax deductible as a donation to the AACI under IRS Code 501© (3).
