

THE WRIGHT STUFF

A Word from Bob Wright

Things change. That's the one thing that is certain. And, so it is with the American Anti-Cancer Institute. The five-year plan to build the infrastructure of an organization that could effectively serve all of mankind is nearly complete. The true "wellness platform" that will continue this evolution has been put in place and is beginning to function.

While there is a ways to go yet, we have now established that we can efficiently and effectively help all of those with cancer – regardless of the type or stage. Although we don't cure or heal people (only your own immune system can do that), we give proven direction on what really works and what doesn't. And, believe me when I say – *we really know*. Our protocols are second to none. Make no mistake; people are still looking for the "pill" that will do the job for them. As you have heard me say many times before, it simply doesn't exist. Now, however, without reservation, we know what to do and how to do it.

Product Introductions

There are 400 or so different treatments, therapies, protocols and supplements out there (that I know of) that various people have said helped to heal their cancer. I don't doubt it for a second. We cannot, however, forward remedies that have helped a few but have not been proven for the masses. And, although they may have worked for some individuals, I would not want to bet my life on something that I didn't feel had a great chance to work for me.

Back to the “*we really know*” part. These past five years have been spent in deep study and research regarding cancer and the facts (I said facts – real facts) that surround it. You see, there are a lot of “non-facts” that this dis-ease seems to be buried in. It took us a while, but we eventually separated the wheat from the chaff and uncovered the real truth about cancer, its prevention, its lies, and its cure (only the human immune system heals cancer). The last seven words in the preceding parenthetical phrase say it all. It was – and is – the “Holy Grail” of cancer healing. And, it can't be denied, declined, derided or debunked. In fact, it must now be considered the “by default” answer to cancer.

After that discovery, the only thing left was to find out what would stimulate, strengthen and heal the immune systems of cancer sufferers that have been assaulted on a daily basis by chemicals, poisons, radiation, non-foods, fluoridated water and chemotherapy. Of course, that “only thing left” was a pretty big thing.

We discovered – really, to no one's amazement – that we had come full circle. You see, in America's recent history, man lived on foods he grew himself, in mineral rich soils and without tons of pesticides. He ate meat from animals that were not injected with antibiotics and hormones – and that ate pure grass and grains themselves. He drank pure water from uncontaminated wells and rushing mountain streams. He breathed clean air not inundated with factory pollutants and chemicals. He cleaned his body and his house with natural soaps and cleaning solutions and slept well each night after a day of hard work (exposed to sunlight) and exercise. On those occasions when he did get sick, he used the medicine of the earth (natural plants) to bring healing.

Things have changed. We are not of that culture and lifestyle any longer. But, wait a second, what if we were? Or, what if we could bring back the part of that existence that is reproducible, and substitute or “add-in” that which is not? Could we actually do that today? Well, you guessed it, the answer is an emphatic “yes,” yes we can. That, folks, is the real solution to cancer (actually, to all

sickness and disease) that is now uncovered and exposed for all to see. It's pure, and it's wonderful. And, it works.

So, what is "it?" Glad you asked. You cannot heal cancer – or any other disease – unless you know what causes it. Today's doctors either don't know or refuse to recognize what has been mentioned above. There is simply too much money in conventional medicine to abandon it now – regardless of the facts.

Here it is, not in a book so that you would become confused (there are lots of those) but, instead, in a paragraph or two so you will understand the simplicity of human healing and wellness.

All sickness and disease has, as a causative factor, acidosis, which, in turn, produces inflammation, which wreaks havoc in the body. The inner terrain turns very acidic and becomes the friendly host for every bacteria, virus, fungus and parasite known to man. Oxygen levels are depleted, poisons and chemicals are abundant. Cells are deprived of oxygen and turn to sugar to create energy and divide out of control (become immortal). This is cancer – or any other disease now very common to man.

So, working backwards, we recreate the internal environment by introducing the nutrients, fluids, supplements and protocols that reverse the situation. We detoxify the body at a cellular level to allow these nutritional therapies to do their work. We add in iodine (everyone is deficient) and vitamin D3 (almost everyone is deficient). And, Voila! It's a miracle! Only, it's really not. The body is just doing what it is supposed to be doing with what it's got. And, it works almost every time. I say "almost," because if your immune system is severely compromised or destroyed by chemicals (chemo) and radiation, the chances are slim.

"There is no reason for a recently diagnosed patient to ever die of cancer again." A quote to me from Webster Kehr, the Cancer Tutor. He is so right.

By introducing the right water, full of alkalinity and antioxidants, eating the anti-cancer diet (full of organic vegetables), detoxifying at the cellular level through PIOH (precision intestinal oxidative hydrotoning) that also fills the body with oxygen that cancer hates, and supplementing with the world's best and most nutritive super food, the immune system heals, homeostasis is restored.

I know. Sounds way too simple. It's not; we've proven it, over and over again. Remember that old empirical evidence stuff? If something is repeatable with relatively the same results, it must work. Or, examine Ockham's Razor which states that, when confronted with several theoretical solutions to a problem, the most straightforward and simplest is the best.

Cancer solved. What's next? Therein lies our next project and directs us to the remainder of this lifelong work. Heart disease, diabetes, arthritis, Lupus, fibromyalgia, all the autoimmune diseases, neurodegenerative diseases (Parkinson's, ALS, Alzheimer's, etc.), Autism – the list is virtually endless. And, while we can't claim that we have the solutions to all ailments – we have seen the human body heal most of these when given the right ingredients.

By the Grace of God, we now believe that we can be of assistance to people from all walks of life suffering from most all sickness and disease. As a result, over the next several months you will see the American Anti-Cancer Institute transition to become the International Wellness & Research Center. It just makes sense. We will continue to specialize in cancer, its prevention and treatment, and promote, through our many new proposed locations, the educative process that gives people a living chance. We will invest in the true research which results in new products, therapies and protocols that are natural and efficacious.

As we evolve, you will see our new on-line store take shape and see feature articles in this newsletter about products that we recommend – and, exactly why we make those recommendations. Yes, as mentioned in the last monthly missive, for the first time we will be marketing products – but only the foods, supplements, equipment, etc., that we would use ourselves.

Please be patient as we grow and expand rapidly over the next few months – and years. We look forward to establishing satellite wellness centers in many different locations throughout the U.S. and the world. We will be setting up four regional offices/centers that will be hosted by our current Ambassadors in San Diego, Tulsa, Springfield, MO, and The Villages, FL. Look for these relatively soon.

We are here to serve. It is as simple as that. Let us know what you think – we are very interested. ♦

If You Have Had Chemotherapy

Most of you reading this know exactly where I stand on chemotherapy. If not, let me give you a dose (of reality).

These drugs are becoming so toxic that they are actually responsible now for killing the patient before the cancer does. Led by the platinum-based line, these poisons will affect your brain, your heart (put you into a-fib), your intestinal tract so you cannot properly digest food and absorb nutrients, give you mouth sores, make your nails and teeth fall out, etc., etc., etc. Had enough? Many of you know this already.

To be fair, chemotherapy does kill some cancer cells. Unfortunately, it does not have the ability to kill all of them – including the stem cells. It is known to cause cancer and spread cancer – no news there.

The real question is, “why would we allow these poisons to be put into our bodies if they are so toxic?” Good question. If anyone has a legitimate answer, please email it to me. I understand, though, the pressures we face with a cancer diagnosis and our penchant for doing what we believe is the right thing by listening to our doctor. I also know of so many cases where family intervenes – believing that these treatments are the right thing and the only hope for their loved one. They are wrong – they just don’t know it.

I’m not here to ascribe blame, just to forward the truth. Chemo won’t heal you – it has no possibility to do so. We have all heard, however, of someone who has survived this onslaught of toxic chemicals. Believe me when I say they do it in spite of the drugs, not because of them. In most instances, they change their lives, i.e., the right food, water, detox, etc., and it makes all the difference. You should know by now the real statistics that surround this treatment that was derived from poisonous mustard gas from World Wars I and II. The study by Ward and Barton that was published in the December, 2004 issue of the Journal of Oncology, states emphatically and truthfully that only 2.1% of people who undergo chemotherapy treatment in the United States live beyond five years. That means that almost 98% are dead within five years. I don’t believe that any of us would roll those dice – knowing these formidable odds.

If you have gone through chemotherapeutic treatments or are currently on them, I've got a few suggestions for you. Of course, if you advise your oncologist, he will tell you, "No, don't do those; it will dilute the effectiveness of the drugs." To me, that would be a singular reason TO DO these things. Remember, this is the same doctor that says it doesn't matter what you eat and why we see chemo patients eating ice cream cones and drinking soda pop while being infused.

If it was me – and I elected to undergo this therapy (which, by the way, I would never do – for many reasons), I would most certainly engage in three things. I would drink the right kind of ionized, high-alkaline water, consume loads of the world's best nutritional supplement, and take an antioxidant product that could make a lot of difference throughout this daily grind.

The water, you should know, is Kangen Water from the Enagic ionizers. The super nutrition comes from the Reliv Supplements. I want to dwell today on a product that I introduced in an earlier newsletter that deals directly with the severe oxidation of the human body brought on by the toxic mess that courses through your veins via chemotherapy treatments. That product is Protandim™.

Protandim™ is a synergistic combination of natural substances that are all very anti-cancer on their own. Put them together and they create an antioxidant powerhouse that many say has helped to heal their disease. I won't disagree with that, and do believe that free radicals are snuffed at an incredible rate when introduced to this product. Milk thistle, bacopa, ashwagandha root, green tea leaf, and turmeric make up the recipe to what some are describing as the most powerful antioxidant ever made.

So, just how does it work? Protandim™ activates the S.O.D. (superoxide dismutase) enzyme in the body. This enzyme appears to have the ability to neutralize 1 million free radicals per second for 13 days. It also increases glutathione production in the body by 300%. We know that glutathione is also known as the body's "master antioxidant."

Cancer patients and chemotherapy patients absolutely need this product. Start off with 2 capsules per day then gradually increase to six. In this case, more is better. Nothing in this formula can hurt you – and it won't interfere with any toxic chemical or radiological treatments you are going through.

You can acquire Protandim™ by going to Bill Henderson's website at www.mylifevantage.com/498050. For full disclosure, Bill donates all the proceeds from this site to the American Anti-Cancer Institute/International Wellness & Research Center. Thanks, again, Bill. ♦

Wellness Testimonial

Let's face it, we all like testimonies – especially from those who have been suffering or struggling with cancer – and, we love to hear about their recoveries. Funny thing, it seems like my office is getting chock full of these.

I know what you are thinking. How can that be? After all, you have heard me say time and again that less than 3% of those who undergo allopathic therapies (mainly chemotherapy) are alive five years later. So, how can I have a pile of healing testimonies?

It's really simple. People who do the right thing from the start – right after diagnosis – have the best chance to survive and most do if they follow the straightforward protocol. Those who do not, and undergo round after round of chemo and radiation, who struggle through surgery after surgery to “make sure we get it all,” well, you know the stats. The fact is that 95% of cancer patients won't come to see us, or other like-minded wellness experts who try to heal the human immune system, until they have exhausted their conventional options. By then, it is simply too late. Their bodies are sick, poisoned and dying, and their immune systems are seriously compromised or non-functioning.

Below are two people who beat the odds. And, they did so because they did the “right thing” for cancer.

In early 2011, when Kathy was in for a chiropractic adjustment, she let the doctor know that she probably wouldn't be coming much longer because she was recently diagnosed with inoperable lung cancer and given less than 90 days to live. The doctor said that he wished she would have mentioned this earlier and asked her if she had ever heard of drinking alkaline water for health. She had not – but she started on the water immediately.

She said, “Give me the strongest stuff you've got and I'll drink it.” She drank a gallon a day of 11.5 pH ionized water then returned to her oncologist 2 months later. He told her that her cancer had diminished by 93%! Obviously, she continued to drink the water for full recovery.

About this time, she received a call from her son in Sacramento, CA who said that he had been diagnosed with Hodgkin's Lymphoma and had just been released from the hospital. There was no more they could do for him. His disease was terminal and he didn't have long to live.

Kathy packed up her water machine and flew to Sacramento where she told her son that he would be drinking a gallon of this water a day – just like she did.

After about a month, he was back to work and feeling great. At 9 weeks, he went back to the doctor for a check-up and they were somewhat surprised to see him still alive. After they checked him out they said that he was cancer-free. Of course, they both still drink the Kangen Water every day.

Kathy is not the woman's real name – but I verified this testimonial three times, through three different witnesses, and the woman's husband. It is true.

No one can tell you that Kangen Water will heal cancer – because it does not. However, when you flood the body with hydration, alkalinity, and antioxidants, the immune system responds, as it did here. It works, friends, because the ingredients and mechanisms of ionized water are based in real science – not the hocus pocus that mustard gas-derived chemotherapy comes from.

It is said that each 12-ounce glass of 9.5 pH Kangen Water has more antioxidant capacity than all of the organic fruits and vegetables one could possibly eat in one day. Do you think that would be good for you? There you go, real science. The best way now to bring the body to an alkaline state is by drinking ionized water. Is that good for cancer patients? And, everyone? There you go again, real science. The water is low micro-clustered – which means that more of it will get into your cells more rapidly. Would it be better to hydrate with water that gets into your cells only 17% of the time or 80+% of the time? Real science, tested and proven, once again.

In the testimonial above, the two individuals drank 11.5 pH water (ultra-high pH), which no one recommended that they do. They were both dying and knew they had nothing to lose. This very high alkaline water appeared to make a huge difference for them. It just might for you too. ♦

Organics

Do You Know the Difference Between Organic and Non-Organic, and the Importance of Knowing the Difference?

Most people are unaware there are 3 different levels of ORGANIC. There is Certified Organic, Organic, and Made With Organic Ingredients.

Certified Organic simply means 100% organic, containing ONLY 100% organic ingredients, and displays the USDA Organic Seal.

Organic products may not contain any GMO's, or genetically modified ingredients, they may use the USDA Organic Seal, but not 100% or Certified Organic, and AT LEAST 95% of their ingredients must be organic.

Made With Organic Ingredients contain 70% or more organic ingredients, with the remaining GMO free. Made With Organic Ingredients may not use the USDA Organic Label, and may not say more than "Made With Organic Ingredients".

It is my goal to help you identify what foods are TRULY organic, and those that are not. The reason this is important to your overall health, is based on potential for pesticide contamination, AS WELL AS the amount of minerals in organic food compared to conventional food. With organics, calcium is 63% higher, chromium is 78% higher, there is 73% more Iodine, Iron is 59% greater, Magnesium is a whopping 138% greater, potassium is 125% higher, Selenium is the greatest of all at 390% higher, and zinc is 60% higher.

It is important to understand the overall health value and impact of purchasing Certified Organic foods that are GMO-free, and contain 100% organic ingredients. THIS is what's best for YOUR health, and the overall health of your family!

Get educated. Get healthy, and stay healthy!

Executive Director of Educate A Cure

Finally! Pain Relief

Pain. It appears to be one of the constants in our society today, in one form or another, especially with cancer. Back pain, arthritis pain, gout pain, migraines, etc. This needs no explanation – we all have experienced one or more of these – or something else.

Well, it has finally arrived. Please sit up and take notice – this will affect all of us. We have discovered (we don't produce it) an organic, 3-seed drink that is said to eliminate pain and reduce cancer. This is the claim. Do we believe it? After witnessing the results firsthand, and reading the testimonials, you bet we do.

A combination of black cumin seed (black seed), black raspberry seed, and chardonnay grape seed, this product has been reported to virtually be producing miracles for those wracked with chronic pain. And, it makes perfect sense. These are the world's most anti-inflammatory and anti-oxidant seeds.

If one understands the analgesic and anti-inflammatory effects of these three individually, it's very easy to get to the synergistic efficacy when they are put together. Remember, acidity produces inflammation and inflammation begets pain. It is purely as simple as that. Get rid of the inflammation – get rid of the pain. That's how it works, and it does work.

Want proof? Okay, you asked for it. The following are excerpted from studies done on these seeds and are forwarded by the <http://umm.edu> website:

“Nigella sativa (black cumin seed) has been used as traditional medicine for centuries. The crude oil and thymoquinone (TQ) extracted from its seeds and oil are effective against many diseases like cancer, cardiovascular complications, diabetes, asthma, kidney disease, etc. It is effective against cancer in the blood system, lung, kidney, liver, prostate, breast, cervix, and skin with much safety. These results suggest that nigella sativa has analgesic and anti-inflammatory effects...mechanisms other than stimulation of opioid receptors are involved.”

“We found that non-toxic levels of black raspberry significantly inhibited the growth of human cervical cancer cells.”

“Black raspberries and their bioactive components represent promising candidates for future phytochemical-based mechanistic pathway-targeted cancer prevention strategies.”

“Black raspberries have been shown to inhibit multiple stages of oral, esophageal, and colon cancer.”

“Anti-inflammatory effects of freeze-dried black raspberry powder in ulcerative colitis.”

“Black raspberry extracts (RSE) have been shown to inhibit breast cancer cell growth and stimulate apoptosis.”

“The ability of topical BRE to reduce acute UVB-induced inflammation and to decrease tumor development in a long-term model provides compelling evidence to explore the clinical efficacy of BRE in the prevention of human skin cancers.”

“Seed flours from chardonnay grape were examined as dietary sources of natural antioxidants and anti-proliferative agents for optimal human health.”

“Studies have found that grape seed extracts may prevent the growth of breast, stomach, colon, prostate, and lung cancer cells in test tubes. However, there is no clear evidence yet whether it works in humans. Antioxidants, such as those found in grape seed extract, are thought to reduce the risk of developing cancer. Grape seed extract may also help prevent damage to human liver cells caused by chemotherapy medications.”

This is the pudding, folks. And, you know where my Great Hekawi Grandmother said that the proof always lies. In the pudding.

Here’s more of that empirical evidence stuff: My friend, Dr. Brad Weeks (Dartmouth-trained M.D. – read *very smart!*), offers the following:

“If you or anyone you know suffers with any aches and pains (headache, PMS, back pain, arthritis, weekend warrior pains, etc.), or skin disorders (psoriasis, eczema, rash, acne) – then this product will be of great interest.

“If you or anyone you know takes aspiring pain killers like aspirin, Advil, Tylenol, Motrin, Ibuprofen (all of which are toxic to kidney and liver), then I have a great solution for you and them.”

In Dr. Week’s experience, this 3-seed drink called SOUL did the following within 2 days in different people! He has never seen anything like this:

- Took away his “own” **back pain** of 25 years
- Took away severe pain from **shingles** in 5 minutes (oral & topical application)
- Took away pain from **gout**
- Took away chronic **headaches** (cluster, migraine, tension)
- Took away severe **sciatica**
- Reduced severe **chronic hip pain**
- Removed chronic **back pain, neck pain, and knee pain**
- Reduced **eczema-like rash** so that the person said it was “no problem”
- Removed itch from **poison ivy rash**
- Removed **trigger finger pain**
- Removed pain related to **gastric ulcer**
- Eliminated swelling and tenderness when taken before **wisdom teeth** removal
- **PMS cramping** – gone in hours after taking 1 packet of SOUL
- Eliminated **pain of intercourse** in case of prolapsed uterus (3 years duration)

And, finally, a partner suffering with gout had a great idea which will go viral: **he intentionally ate all foods that cause gout in him**, caused the gout to come back and then **TOOK THE PAIN AWAY** with the 3-seed drink, SOUL.

See this at <http://www.youtube.com/watch?v=nL2B5FuvYqg> and the follow-up at <http://www.youtube.com/watch?v=QCxAYkxAyQI>.

So, how do you get this incredible product? SOUL, produced by “Rain International,” can be purchased retail as a Referring Customer for about \$50 for a box of 20 packets, or as a “Rain Partner,” for \$80 per box of 30 packets. Of course, the more you buy, the less expensive it gets. You can get all the details and acquire the product at www.myrainlife.com/aaci. Yes, that is our acronym at

the end of that address. We are not network marketers, however, we are so impressed with this product and – we know we need to get it into people’s hands, that we joined up to get the best prices and enable others to acquire it easily and support the International Wellness & Research Center/American Anti-Cancer Institute at the same time.

We know this will be big. Pain is big – why wouldn’t this be. And, when you believe you have a solution (we do), you have to tell people and advise them where they can get it.

Of course, some will complain about the price. On the other hand, many I know, who are in very significant pain, would pay *anything* to get this product. They would consider it very inexpensive. You can judge for yourself. I firmly believe that everyone should have a box of this on hand at all times.

The testimonials keep pouring in. I must give a disclaimer, however. Neither we, Rain International – nor anyone, for that matter, can claim that the SOUL product *heals anything*. Remember, inflammation is the root of all pain. Through proven mechanisms that have been studied for decades and decades, the ingredients (seeds) within this product have been shown to alleviate inflammation. As a result, the body (immune system) will heal itself.

Again, go to www.myrainlife.com/aaci and acquire this product as rapidly as you can. And, tell your friends. This is catching on so fast that – by simply alerting a few to this remarkable substance – you may be able to, effectively, acquire yours for free. Think about it.

Product Introductions:

We continue the efforts we began last month to introduce the best products available for your healing and continued wellness. Again, these are the products we use ourselves. **Just click on the product pictures and start shopping for your health today.** You benefit and also support the efforts of the AACI/IWARC to bring guidance and renewed health to those suffering from cancer and all other sickness and disease.

Livon Labs

Liposomal Vitamin C is the first choice of people who really understand bioavailability and the importance of high-dose vitamin C. LivOn products are all encapsulated in liposomes. As a result the nutritional supplements are able to bypass the body's normal barriers to absorption into the bloodstream and into cells. Try all three today - Lypo-Spheric Vitamin C, Lypo-Spheric AGE Blocker and Lypo-Spheric GSH.

Vital Choice Wild Seafood & Organics

Vital Choice offers home delivery of a wide array of the world's finest wild seafood harvested from healthy, well-managed, wild fisheries and Organic, Natural, and Kosher foods, picked for their superior nutritional and culinary qualities. They provide only pure, healthful, and sustainable foods of exceptional quality complete with a 100% satisfaction guarantee.

Joe Ball Company

The Navarro HCG Cancer Test Kit is a simple and convenient way to test for cancer in your body in the comfort of your own home. This kit contains supplies for a simple urine test to determine if HCG (Human Chorionic Gonadotropin), an indicator of cancer, is present in the body. The test is one of the safest and most accurate indicators available and allows for early detection of the disease. The kit can also be used to monitor treatment progress.

WHAT WOULD THE AUTHOR, BOB WRIGHT, DO IF HE HAD CANCER? The "Wright Stuff," of course!

IN THIS BOOK:

- Read meticulously documented **Truth** about the AACI **Cancer Paradigm** and what it means for you and your family.
- **Be amazed by doctors** and medical professionals who know this Truth-- some want you to know it, and some don't... Learn why.
- Learn what you absolutely *must do and stop doing* if you have cancer right now, and what you *must do* for cancer prevention.
- Understand detoxification and the cancer diet in plain English.
- Learn about the **American Anti-Cancer Clinic:** situated within a 100-acre plus cancer-healing complex in the Pacific Northwest, to which cancer victims can come from all over the world where all their needs will be met—medical, educational and nutritional, at less than one tenth the cost of current cancer care today. We believe that "**if we build it, they will come!**"

This Book represents our "bread and butter" fundraiser, so we greatly appreciate your purchase and thank you for supporting the AACI. \$12 of each book is tax deductible as a donation to the AACI under IRS Code 501© (3).
