The Wright Stuff
A Word from Bob Wright

Here’s the word this month: EBOLA

Scared yet? No need to be. Concerned – yes; scared – no. And, here are the reasons why.

Quest for the Cures … Continues
AACI Sponsor Highlight: Life Insurance Buyers, Inc.
Ebola is just a virus. True, it is more virile than the cold virus, flu virus, or herpes virus – but still a virus nonetheless. We should pay attention, take notes, and learn precautionary measures but, first and foremost, we should learn the truth about what this really is and, equally important, what it is not.

While it is purported to not be airborne, not to live on surfaces, and not to be contagious unless the patient is symptomatic – I don’t believe this and neither should you. All of these have, basically, proven to be untrue. If a sneeze travels at 100 miles per hour (some studies say more – some less) and Joe Ebola sneezes in your immediate vicinity – don’t tell me that a disease that is contracted by contact with fluids cannot be airborne. I have watched people talk with a backdrop of the morning sun coming through the window. I was shocked at how much “spray” comes out of one’s mouth when just speaking. So, a sneeze is a virtual hurricane of small water droplets (fluids) that is covering a lot of ground in a short period of time.

However, instead of looking for refuge in old Uncle Ned’s 1950’s underground fall-out shelter, we should be thinking rationally and searching for the truth. Remember the bird flu scare? The H1N1 virus that was going to sweep the country? The annual flu virus strain that will be devastating this year? And, next year? And, the year after that? Folks, these never materialized. And, why not, you ask, when we were promised that life as we knew it was going to change forever? Here’s another question to answer the last few. Haven’t we yet concluded that the real reasons for the apocalyptic pandemic predictions that seem to be coming more and more often are simply a way for the pharmaceutical companies to sell more vaccines? This industry is simply looking for more ways to market more drugs now that the patents on their darling (and profitable) standbys have run out and generics are being offered at a tenth of the price – and less.
You have heard me say before that the FDA (some people call that the Federal Death Administration – but for the life of me, I don’t know why) and Big Pharma are in bed together. Actually, it is proven day in and day out as Board Members and employees of both rotate from one to the other on a continuous basis. Is not, indeed, the fox in the hen house? The former protects the latter as it is a major source of revenue for the basic governmental agency that is supposed to be protecting you and me – our food and our drugs. I guess that’s why we have GMO’s, high fructose corn syrup, and chemicals permeating our food supply today and scores of drug ads on television that spend half of their allotted time pronouncing the “side effects” of said drugs – with, usually, the last one being death.

Of course, by now you have probably heard the story from the nurse in West Africa that was quoted (several sources – Google it) as saying that Ebola is not endemic to the countries where it is now proliferating; meaning simply that it does not originate there and is not native to these countries. The nurse goes on to blame the Red Cross and its vaccination program, stating emphatically that nobody was getting sick until this started. Well, I’m not here to blame the Red Cross, but it sounds a little peculiar, doesn’t it? And, I’m not a conspiracy theorist, but could this be just a distraction for something else that is taking place? I will let you be the judge of that as I wish to go no further into the politics of sickness and disease.

No, instead, I would like to tell you what to do about it. Or, as I always try to say, what I would do about it. You must make your own choices.

Again, Ebola is just a virus. Viruses do not kill us unless we allow them to. We have always had the ability to eliminate them before they get us. Once again, though, the methodology to do so has been maligned, denied and hidden and, sadly, most of you (and our country) have no clue about it. And, for full disclosure, there are several “its” here.
If I was stricken with Ebola, or suspected that I may have been infected, I would immediately do the things that would kill it before the symptoms got out of hand. First of all, I would consume copious amounts of vitamin C in its “liposomal package.” Or, if symptomatic, I would find a good Naturopath who would hook me up to very (and I do mean very) high dosage intravenous sodium ascorbate (vitamin C). I would also mega dose on vitamin D3 – which most of us should be doing right now anyway. I would get mine in the form of Blue Ice Fermented Cod Liver Oil from the company Green Pasture. This is one of (perhaps the only) the last really good cod liver oils left in the country. Most companies are removing the vitamins A and D and replacing them with synthetics – or not at all. You can get this in capsule form. But probably the most important thing I would do would be to start consuming at least 8 ounces per day of ionic silver. I would get mine from CJ at the Eutrophean Health Institute – it’s called “Silver Angel.” Ionic silver is at least 10 times smaller than colloidal silver, enabling it to get into the smallest of capillaries and all of the tissues. Here’s what CJ says:

“Bob, are you telling your customers that Silver Angel kills over 650+ viruses like MRSA, EBOLA, West Nile, malaria (parasitical), Lyme, and Hep C? With all this Ebola going on (mostly government doings, I think) we need to get the word out on silver. People should be drinking this everyday so they don’t get it.”

You will love CJ – she’s a wonderful gal. To acquire the Silver Angel, call her at 877-487-3083 or 719-487-3083. Her email is silverangel@hushmail.com.

We have been recommending silver for many, many years now. No known bacteria or virus has been known to withstand the effects of this powerful metal/mineral – especially in its ionic form. Great results have been seen with Hepatitis C and chronic Lyme disease, two maladies that
conventional medicine has no answer for. It may take a large volume of the silver for these, but it works. It also is effective for cuts and burns, food poisoning, salmonella, stomach viruses, etc.

I am firmly convinced that every medicine cabinet should have at least one bottle of this – or many. I know mine does.

For many, Ebola can be a death sentence – and I would never make light of that. However, it appears that the lack of knowledge, in most cases, is the real killer.

The Pinkwashing Queens

Now that National Breast Cancer Awareness Month has passed, it is time for a closer – yet brief – look at who (outside of the American Cancer Society) really rules in October when it comes to the “ownership” of breast cancer.

The Susan G. Komen Foundation would have you believe that they are the owners of anything “for the cure,” and have sued to protect that. Oddly, they do absolutely nothing for prevention (the real cure) and support mammography and making money.

So, in our continuous quest for the truth – and nothing but the truth – we offer up this month a couple of paragraphs from Staff Writer L.J. Devon of NaturalNews.com in his/her recent article about Komen’s new partnership with the fracking industry to ‘pinkwash’ cancer-causing chemicals pumped into the ground:

“By now, Americans are aware that breast cancer exists, thanks to the pink color-branding marketed by the Susan G. Komen Foundation. The foundation has literally ‘pink washed’ the entire month of October, routinely partnering with outside organizations to sell products and raise money for their pink marketing machine, which primarily pays high salary executives, marketers and pharmaceutical sponsors. According to Charity Navigator, the foundation spent $18,394,170 in 2013 on administration expenses alone, allotting $560,896 to Founder and CEO Nancy Brinker and $606,461 to President Elizabeth Thompson.

“Sadly, all the pink hype provides virtually no education on the environmental toxins and heavy metals in the food and water that
are directly linked to cancer, and the foundation does nothing to clean the world of these cancer-causing substances. The money does not go into the hands of actual cancer patients to help them make informed decisions on treatment, clean water, better nutrition and cellular detoxification; the money feeds the cancer management industry instead of helping people empower their own immune systems.”

You can find the rest of this article by going to NaturalNews.com and looking for this Komen article as written by L.J. Devon on October 29th. While you are at it, sign up for their free newsletter that comes daily. It is a wealth of information (and truth) by Mike Adams (the Health Ranger) and his crew. ♦

What to Do After Cancer Diagnosis

At the link below, Bob discusses with the folks at ihealthtube.com (and with you) exactly what he would do immediately after a cancer diagnosis. It’s only seven and a half minutes – and over 55,000 people have now viewed it.

Click [here](#) to watch the video now.
Reliv and Kangen Water Testimonial

Diabetes with complications

Patient: Madam Chan (actual name withheld), age 55; Location: Kota Kinabalu, Sabah, Malaysia

Symptoms/Diagnosis
History of diabetes over 20 years and passing daily protein in her urine (proteinuria). As a result, she has lost weight and body muscle mass. Also, she cannot sit down on her thin buttocks (gluteus maximus) for more than 30 minutes because of loss of this muscle mass and thin skin. Her labia majora (tissue around the female organ) has become extremely thin, itchy, and bleeds from scratching and has been very painful for the past 20 years due to fungal infections from her proteinuria and sugar in her urine.

Turning Point
On October 3rd, 2014, I recommended for her to take the Reliv “Now” and the “Lunarich X” supplements with Kangen Water at 9.5 pH and 11.5 pH. In the AACI book, “Killing Cancer – Not People,” Bob Wright recommended:

1) Reliv “Now” (nutrients) and “Lunarich X” (epigenetic lunasin peptide) for degenerative diseases and cancers;
2) Kangen Water for enhancing Reliv nutrient supplements that would be better absorbed through the very low microclustering properties which would then help the nutrients better penetrate the cells.

Within 4 days of consuming this protocol, all of her symptoms were reversed. On October 7th, 2014, she experienced no more itchiness, and was able to sit down with an increased gluteus maximus muscle mass and
fleshier labia majora. It is our opinion that Madam Chan had her symptoms alleviated and situation reversed due to the nutrients from the Reliv products activating her DNA and immune system for healing. With Kangen Water enhancing the absorption, it appears that her pancreas was able to resume secreting insulin to help heal her diabetes very rapidly (20 years of diabetes reversed in 4 days!).

Scientist Ray Kurzweil’s studies show how alkaline water with high negative ORP (oxidation reduction potential – negative charge on the water) helps in better absorption of nutrients. This is documented at www.checkoutalkaline.com/files/Ray_Kurzweil_Q_A.pdf.

WHERE’S BOB?

Bob is now booking dates for his “No Suits, No Ties – All Truth, No Lies” Tour beginning in January. He will be promoting the new Third Edition of “Killing Cancer – Not People” and introducing new products, supplements, treatments, and therapies that are game-changers in the (seemingly) never ending battle against cancer.

January 16th-18th and 30th-31st are already spoken for. He will be in Dayton, Ohio first and then at The Villages in Florida at the end of the month. So far, February through April are open.

If you have an interest in having Bob out to your location, send an email to info@americanaci.org and we’ll let you know how it works and what it takes.
Guest Article: MSM – Organic Sulfur

Below you will see a guest article on organic sulfur from my new friend, Antonina. She is the source of this new, incredible, 99%+ pure MSM and outlines what it is and what it does in the body. As you will see (I’ve written about this before) there are fewer things that it doesn’t do than the long list of benefits it supplies.

To acquire this, please contact us here at the AACI/IWARC and we will put you in touch directly with Antonina. Use the code MSM-AACI to get the discount on this. Regular price is $62 – with the code only $50.

Thanks, Antonina!

MSM - Organic Sulfur

Exploring The Missing Element
By Antonina Bureacenco, CNP, OHP

Studying health and nutrition for many years I learned a lot about many amazing molecules and compounds that exist in nature and make up our bodies. These include water, carbohydrates, fats, proteins, vitamins, minerals, enzymes, probiotics and an array of other nutrients.

With what I studied in school and on my own, I never came across MSM Sulfur (Methyl Sulfonyl Methane) until I became aware of its importance in Vitamin C formulas. What I started
finding kept me up at nights with excitement! I was astonished at the power of this one compound and how little we use it in the natural health community.

If you visit a nutrition store and check MSM Sulfur labels for its recommended use (or purpose), you will find the following statement: “Helps to relieve the pain associated with osteoarthritis of the knee, and osteopathic pain.” It’s mostly recommended for support of bone and joint repair only, which in my opinion, is a huge understatement of its true potential. Continuing on with my discovery I set out to find out as much as I could about it and made a list of benefits that I could share with others. Here is what I found:

- It restores bones and connective tissues, helping to relieve the pain associated with osteoarthritis of the knee, and osteoarthritic pain
- It greatly improves Vitamin C absorption and is recommended to accompany Vitamin C (in the supplement formulas); delivery to the problem area is much improved when used together
- It is water soluble and is the third largest nutrient in the body
- It improves the body’s ability to make its own antioxidants – glutathione, which is present and vital for every cell
- It helps reduce inflammation, as a fantastic free radical scavenger and detoxifying agent
- It maintains the body’s defense system, protecting it from the flu and colds
- It is referred to as a ‘beauty element’ and helps improve health of our skin, nails and hair (for example: it makes up to 35% of our hair!)
- It makes bonds between proteins more flexible
- It improves flexibility in tissues, through increased cell permeability
- It is efficient at cleansing the colon and flushing out parasites
- It improves flexibility and permeability of the intestinal wall, which helps increase nutrient absorption
• It can help with varicose veins, red spots and other dermal problems
• It helps normalize blood pH
• It can regulate diabetes; sulfur is necessary in the production of insulin, as well as other sulfur-based amino acids necessary for the metabolism of carbohydrates
• It helps reduce allergy symptoms by being an efficient antioxidant
• It helps prevent medication over-reaction
• Many vitamins and minerals need sulfur bonds, these include: coenzyme Q10, selenium, calcium, magnesium, pantothenic acid, A,C,D, E all enzymes and amino acids (if you don’t have enough organic sulfur a lot of vitamins and minerals run through you)
• It helps detoxify aluminum and lithium from the brain, and can be helpful for Alzheimer patients
• It regulates cholesterol, lack of MSM results in elevated cholesterol
• It helps dealing with yeast and Candida
• It helps with glaucoma, likely due to its ability to increase blood’s pH and antioxidant potential
• It helps with macular degeneration; MSM is a potent building material that helps rebuild the damaged tissue
• A study of the periodic table shows sulfur, selenium, and tellurium are the only oxygen transport minerals

Is this not an incredible list of benefits? For me, these findings confirm that nature (and all creation) is incredibly intelligent. If Organic Sulfur is given a fair chance and is used respectfully, it will facilitate and support the body’s ability to heal.

Explore this wonderful element, enhance your lifestyle and share your results with me!

In Great Health,
Antonina ♦
Dr. Lubecki Testimonials

Recently, I got an email from a friend of mine, Dr. John Lubecki, of the Lubecki Wellness Center in the Sacramento, CA area. Dr. Lubecki is a chiropractor that has more success with cancer patients than most of America’s oncologists – put together!

I want to share with you a few short quotes regarding some cancer patients that he has seen:

“We now have perfected this treatment so well that most patients get well in a day or two from every condition: cancers, Parkinson’s, MS, allergies, etc. We have had several prostate patients recently and they got well at once. MD’s just wanted to do surgery and chemo and told them they had no more than six months to live.

“We have also had several women with breast tumors. These are the easiest to treat. The sooner treatment can be started – the better. The same applies to brain tumors. It is impossible to fail.

“I asked one of my patients to ask her doctor about the success rate of chemo. He hesitated and told her that it is only close to 3%. Yet they keep doing the same thing over and over just because there is so much money to be made. They do not care about the patients. Our success rate with prostate, brain, and breast tumors is 100%. With this wonderful new treatment, we are sitting on an oil well. If only we could get more people to know what we can do for them and that they do not have to die of cancer any more – or submit to the crazy medical chemos or other idiotic medical procedures.”
Dr. Lubecki’s treatments include homeopathic imprinting, low-level laser therapy, and a brand new form of super detoxing footbaths – among others.

And, finally, a last word from the good Doctor regarding his healing protocols:

“Since we have had the new foot baths, which detoxify the body like nothing we have ever had, treating cancer and many other conditions has become so easy that I tell these patients that I guarantee that if they do what I tell them – they have to get well and will never have cancer anymore.”

I know – I know. Pretty powerful words. Check it out yourself. You can call the good doctor at 916-966-7395. Tell him that I asked you to call – he will talk to you directly. Or email him at lubeckijohn@aol.com.

The Uncustomary Book Review

The following book review on “Killing Cancer – Not People” was posted on the link below at the site “The Uncustomary Book Review.” In our opinion, it is an excellent overview of the book and a great individual testimonial for cancer survival. Enjoy.

Click here to read the review now.
From deep within the South American rainforest, an extract designed by nature to eradicate chronic pain; the “Botanical of Compassion”:

**PrimaNeuvera™**

**Prima:** first, most important  
**Neu:** new  
**Vera:** truth

*PrimaNeuvera™* represents the first, most important, new truth; especially designed to eliminate the root cause of cancer-specific, chronic pain. Patients can soon live pain free through the use of *PrimaNeuvera™*. Ideal for addressing this disease through a botanical, non habit-forming remedy; *PrimaNeuvera™* revolutionizes modern cancer pain management.

Utilized in South American clinical settings by thousands of patients during the late 1960’s, with complete effectiveness; the American Anti-Cancer Institute is now actively seeking funding for pre-clinical trials of *PrimaNeuvera™* for use within the United States.

The Pre-Clinical Methodology 5-step process will take approximately 6-8 months to complete and will be available exclusively through American Anti-Cancer Institute clinics.

*The PrimaNeuvera™ difference.*  
*An ancient truth revisited in modern times.*

For further information, please contact the American Anti-Cancer Institute:  
Email: info@AmericanACI.org
PrimaNeuvera

We ran the above piece about PrimaNeuvera a while back on our website and on its own website to draw attention to what we believe is one of the greatest anti-cancer discoveries of all time. Our hope was that we would receive an outpouring of support to help fund bringing this South American plant extract through testing and to those suffering with the unbearable pain of many cancers. It was not to be.

Many of you who have read the Third Edition of “Killing Cancer – Not People” have heard of this product and its efficacy. You see, not only does it eliminate the cancer pain within about 48 hours (many times less), but it also carries those with an immune system remaining (after much conventional therapy) to permanent remission. Our goal is – and has been – to introduce this to cancer patients as solely a pain reliever. It is worth its weight in gold for that benefit alone. However, the other effect isn’t too bad either!

This extract was produced by a small team of scientists, doctors, and researchers in the late 60’s and used in a hospital environment clinical trial on thousands of end-stage cancer patients – in South America. The results were stunning. So stunning, in fact, that the trial was shut down after a year or two by those with conventional medical interests. No surprise there. The extract was tucked away and never heard from again – until recently. All the participants in the study have passed on – except one. He/she (protection purposes) is on our research team, the formulations are safe, the mother extract still survives, the plants are identified (same place, same soil, etc.) and we remain ready to go.

But, it’s always about the money – isn’t it.

We remain dedicated to bringing this to the marketplace when and if we can. Once funding is forthcoming, we are looking at about 120 days and
$250K to make this a reality. Pretty cheap for what it is. Actually, we have applied through major foundations for grants to finish this up. Sadly, none were interested. Yet, we persevere.

We have had offers of investment funding but have not been interested in anyone else controlling this and making it unaffordable for the average person. After all, insurance simply won’t cover it. And, the FDA will consider it an unapproved drug since it is given by intramuscular injection. Thus, its introduction will take place in Mexico or another off-shore site. We have doctors and facilities ready to go. We shall see what happens from here.

Keep this in your thoughts and prayers. If you have ideas or know of potential supporters – please let us know.

---

**Soul Testimonial**

This testimonial about the Soul product that we endorse (3-seed oil) was forwarded to us by Dr. Brad and Laura Weeks. Feel free to listen to the entire call if you wish.

“This recorded call features the fellow Bonnie sat next to on the airplane flying home from the Utah convention who, when he admitted to 11 years of back pain and 3 surgeries…and she graciously shared info on SOUL and...the rest is history! His 11 years of pain was gone in 15 minutes – 11 years of pain gone in 15 minutes! He was headed to Hawaii for vacation and when he returned, thanks to SOUL, he told me he had the best vacation of his life. His wife’s chronic migraines are going away, too.

“Astonishing stuff what Mother nature has to offer.”

The Quest for the Cures … Continues

Many of you have watched the new documentary by Ty Bollinger called “The Quest for the Cures……Continues.” Bob was featured in the second of the eleven episodes at about the 19 and 36 minute marks.

Here are a couple of recent comments regarding this series and the participation of the AACI/IWARC:

“THANK YOU for your efforts to empower the individual that chooses to be empowered. After listening to you speak in The Quest – I am a fan of yours now. Thanks so much for your time and passion to cure the greatest disease on earth…..ignorance.” Greg

“This isn’t a request for help or anything but I have been listening to the Quest for the Cures where Mr. Wright has been featured. I just wanted to thank him for all the information he has given. He has such a wonderful way about him and I just wanted to say thank you. I have learned so much.” Karen

At this time, Episode 2 is still available on You Tube for your viewing. Click here to watch. Better yet, click on the banner below and register to view the entire series.

A financial service for using life insurance today™

For millions of people who are living with a serious illness such as cancer, heart disease, Alzheimer’s or AIDS, the high cost of medical care can quickly deplete essential resources. The same is true for many people over the age of 75 who have complicating health factors. Just putting money aside for basic expenses such as groceries and mortgage payments can be a challenge. LIBI gives people a place to turn for additional resources. Through a financial service called a viatical settlement, we enable people to sell their current life insurance policies for a percentage of the total face value. The money people receive may be used for any purpose and, in most cases, is free of federal income tax obligations.

LIBI can help open the door to new possibilities—such as fewer financial worries, new options for medical care and additional resources to share with family and friends.

All of us have our own sense of what’s important, whether it’s reaching a long-held goal, spending time with family and friends or enjoying the simple pleasures of each day.

What sets Life Insurance Buyers, Inc. apart

People place their trust and confidence in LIBI for many reasons—the financial strength and stability of our company, the experience and commitment of our people, the range and quality of our services, and the leadership and integrity of our organization. These are the qualities that set LIBI apart as the industry’s top broker. LIBI has helped convert millions in policies into accessible funds for hundreds of individuals in need. In every relationship, we take the time to learn what’s most important to our clients and to provide them with the resources they need, in a timely and confidential manner.
People who put clients’ needs first

We truly understand that people place their trust in us every day—to treat them fairly, to deliver what we promise and to be there when they need us. Our mission is to live up to those expectations every time, without exception. That commitment is demonstrated through the professionalism and compassion of our owners. For individuals who are considering a viatical settlement, their personal representative provides a voice of understanding and serves as a trusted resource for help and information.

Leadership that makes a difference

At LIBI, we operate with the highest ethical standards, carefully protecting the interests of our clients. To us, that means maintaining strict client confidentiality, offering fair payment for policies and encouraging effective regulation of our industry. We work closely with the National Association of Insurance Commissioners as well as federal and state governments to promote meaningful regulation of viatical settlements. LIBI works with numerous not-for-profit organizations across the country to help educate and inform the community about this important financial resource.

What’s important?

Choosing a company you trust. At LIBI, our strength, people, service and leadership make a difference to our clients and set us apart as the nation’s leading broker of viatical settlements. We encourage you to find out more about how we can help you ro someone you know.

WHAT WOULD THE AUTHOR,
BOB WRIGHT, DO IF HE HAD
CANCER? The "Wright Stuff,"
of course!

IN THIS BOOK:
• Read meticulously documented Truth
about the AACI Cancer Paradigm and
what it means for you and your family.

• Be amazed by doctors and medical
professionals who know this Truth – some
want you to know it, and some don't... Learn
why.

• Learn what you absolutely must do and
stop doing if you have cancer right now, and
what you must do for cancer prevention.

• Understand detoxification and the cancer
diet in plain English.

• Learn about the American Anti-Cancer
Clinic: situated within a 100-acre plus
cancer-healing complex in the Pacific
Northwest, to which cancer victims can
come from all over the world where all their
needs will be met—medical, educational and
nutritional, at less than one tenth the cost of
current cancer care today. We believe that
"if we build it, they will come!"

This Book represents our "bread and butter"
fundraiser, so we greatly appreciate your
purchase and thank you for supporting the
AACI. $12 of each book is tax deductible as
a donation to the AACI under IRS Code
501© (3).

$22.95 USD
plus $5.00 Shipping/Handling
